Professional Summary

UI/UX designer and researcher collaborating with early-stage teams to explore and shape early product ideas. I specialize in research-driven UX for community platforms and AI-assisted experiences, grounding design decisions in real user behavior. Alongside this, I study how people interact with AI for emotional and reflective purposes, including co-authoring a research paper on emotionally driven use of conversational AI. I also explore AI-supported and prompt-driven product development workflows, using rapid prototyping approaches to quickly translate ideas into testable experiences. I'm most interested in work where research and UX intersect to build thoughtful, human-centered systems.

Skills

- **Research & Strategy:** User Research, Design Thinking, Usability Testing, Competitive Analysis, User Journey Mapping, AI-Enhanced Design Ideation, Qualitative Research Methods
- **Design Practice:** UX UI Design, Wireframing, Prototyping, Interaction Design, Branding, Design Strategy, Visual design, User Flows, Design Systems & Style Guide, AI-Assisted Product Prototyping, AI Prompt Engineering, Generative AI
- **Tools & Technologies:** Figma, Figma Make, Adobe Creative Suite, Antigravity, Cursor, Claude Code, Google Stitch, Git

Projects

Good Doc – Hospital Management System & Application

Designed a multi-hospital management system to streamline clinical and administrative workflows across doctors, front desk lab, and pharmacy. The solution reduced manual processes, improved data accessibility, and enabled faster patient handling through tailored dashboards for each team built for scale and real-world efficiency. Along with the internal system, I also designed a patient mobile application that allows patients to book appointments, manage family members under a single number access medical details, and stay connected with their healthcare providers.

- Defined a multi-hospital information architecture to reduce cognitive load, created both low- and high-fidelity wireframes for multiple dashboards, designed scalable UI components and layout systems.
- Designed end-to-end user flows for the patient journey conducted user and workflow analysis across key hospital roles and collaborated with stakeholders to align business goals with user needs.

AI – Hospital Self-Service Kiosk Experience

Designed a hospital self-service kiosk that helps patients check in, book appointments, and find the right doctor quickly. The experience reduces pressure on the front desk, removes confusion for walk-in patients, and makes hospital entry faster through simple, multilingual guidance.

Astyle – Multi-Marketplace Analytics Dashboard

Designed an end-to-end analytics dashboard for a garment manufacturing brand to consolidate performance data from key marketplaces including Shoptist, Zozo, Qoo10, and Rakuten. Introduced drill-down sales views, size demand insights, return reason analysis, and platform comparison features to enable faster decision-making and more accurate production planning.

Experience

• UI/UX Designer

Vizru Invigo Software Pvt Ltd – Calicut, Kerala

June 2025 – Present

- Worked as a UI/UX Designer focusing on AI-powered product experiences across web, dashboard, application platforms. Conducted user research to understand user needs and identify improvement areas. Designed user journeys, wireframes, interactive prototypes and high-fidelity interfaces to enhance product clarity and efficiency.
- Collaborated with product managers and developers to translate requirements into practical, user-centered designs. Applied design systems, responsive design principles, and usability testing to deliver consistent and easy-to-use experiences that improved overall product usability.

• Freelance Graphic Design

Self-Employed – Calicut, Kerala

June 2024 – May 2025

- Worked with a Bangalore-based client to design packaging, brand logos, and supporting visual assets. Focused on creating a cohesive visual identity that reflects the brand's personality and stands out on the shelf. Ensured consistency across all brand touchpoints while maintaining strong visual clarity and appeal.

Education

• Advanced Program in UI UX Design

Arena Animation – Calicut, Kerala

2024 – 2025
